

# MYC Support Protocol

# MYC Support Protocol

The MYC Support Protocol is a four-month approach to optimizing cognitive and mitochondrial function, promoting the body's natural ability to detoxify, and supporting the gut microbiome, liver, and respiratory system. It includes the Jumpstart Kit, MYC Support Kit, and Advanced MYC Support Kit.

One month of drainage support (via the Jumpstart Kit) is included in this protocol to optimize mitochondrial function and the body's elimination pathways prior to promoting deeper cleansing.

Following the month-long Jumpstart Kit with the two MYC Kits, patients will increase their detoxification efforts and after may experience improvements in their cognitive function, energy levels, and immune health.

## Protocol Timeline

### Jumpstart Kit:

Take for month 1

### MYC Support Kit:

Take for months 2-3

### Advanced MYC Kit:

Take for month 4

\*If needed, add on Bowel Mover or GCO

MONTH	1	2	3	4
Jumpstart Kit				
		MYC Support Kit		
				Advanced MYC Kit

# Jumpstart Kit

The supplements in this kit support the body at the foundational level by delivering key nutrients for mitochondrial health and drainage function. For patients or clients who are new to CellCore products, the Jumpstart Kit is an ideal starting point as it combines supplements that are gentle on the system and that properly prepare the body before promoting periods of deeper cleansing.

## Key Benefits

- Optimizes mitochondrial health and ATP production
- Promotes the body's natural detoxification processes
- Supports healthy drainage pathways

	WAKE UP	MORNING	NOON	EVENING	BEDTIME
CT-Minerals		10  in water		10  in water	
BC-ATP		2		2	
BioToxin Binder		2		2	
KL Support		2		2	
= drops       = capsules					

## DOSING NOTES:

- For those who are sensitive, it's recommended to introduce one product at a time in the order listed on the dosing chart.

# MYC Support Kit

The supplements in this kit lend increased support to the gut microbiome, liver, and respiratory system.

The MYC Support Kit includes Advanced TUDCA, BC-ATP, BioToxin Binder, CT-Minerals, and KL Support. Together, these supplements optimize drainage, mitochondrial health, and the body's natural ability to detoxify.

## Key Benefits

- Helps the body's natural ability to detoxify
- Helps maintain healthy oxygen levels
- Supports cellular repair and renewal

	WAKE UP	MORNING	NOON	EVENING	BEDTIME
CT-Minerals		10  in water		10  in water	
BC-ATP		2 		2 	
BioToxin Binder		2 		2 	
KL Support		2 		2 	
Advanced TUDCA		1  with food		1  with food	

 = drops        = capsules

## DOSING NOTES:

- For those who are sensitive, it's recommended to introduce one product at a time in the order listed on the dosing chart.

# Advanced MYC Support Kit

The Advanced MYC Support Kit encourages more intensive detoxification and is intended as a next step for patients/clients who have completed the MYC Support Kit.

## Key Benefits

- Encourages cellular repair and renewal
- Optimizes mitochondrial function and energy production
- Promotes the body's natural ability to detoxify

	WAKE UP	MORNING	NOON	EVENING	BEDTIME
<b>CT-Minerals</b>		10 <sup>💧</sup> in water		10 <sup>💧</sup> in water	
<b>BC-ATP</b>		2 <sup>📄</sup>		2 <sup>📄</sup>	
<b>Advanced TUDCA</b>		1 <sup>📄</sup> with food		1 <sup>📄</sup> with food	
<b>Carboxy</b>	1 <sup>🥄</sup> in water				1 <sup>🥄</sup> in water
<b>CT-Biotic</b>		1 <sup>📄</sup> with food		1 <sup>📄</sup> with food	

= drops    
 = capsules    
 = scoops

## DOSING NOTES:

- For those who are sensitive, it's recommended to introduce one product at a time in the order listed on the dosing chart.

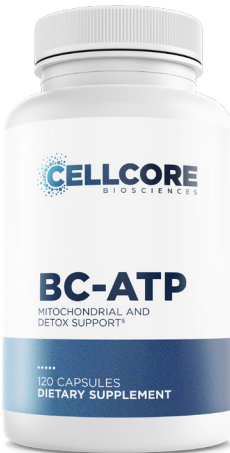

# As Part of the Protocol

## Advanced TUDCA

Lends increased support to the liver bile duct system and promotes healthy bile flow, essential for healthy drainage and detoxification.

## BC-ATP

The highly charged organic acids support metabolism and the ATP cycle in being at peak efficiency. These carbons also assist in the body's natural detoxification processes and contribute to a balanced gut microbiome. In clinical practice, BC-ATP is generally well-tolerated by sensitive individuals and may help improve protocol tolerance.

## BioToxin Binder

CellCore's go-to starter binder. It promotes the body's natural ability to detoxify and lends increased support to the gut microbiome, which optimizes digestive function and immune health.

## CT-Biotic

CT-Biotic is a blend of spore-forming and non-spore-forming bacteria combined with Carbon Technology. It provides 11 bacterial strains that are essential for supporting detoxification, digestive function, and immunity.

## CT-Minerals

A liquid supplement that provides minerals derived from fulvic acid. Sourced from the soil and decomposed plant life, these naturally occurring minerals are typically easier for the body to digest, absorb, and utilize. This bioavailable formula enhances mental clarity, nourishes tissues, promotes energy production, and supports cellular repair and immunity.

## Carboxy

Carboxy is a binder that promotes the body's natural detoxification processes and supports a balanced gut microbiome. It contains short- and long-chain carbons, which can travel to different parts of the body, beyond the gut. This makes Carboxy an ideal detox support supplement for whole body wellness.

## KL Support

Combines herbs and nutrients traditionally used to support kidney and liver health, including beetroot, collinsonia (stoneroot), gynostemma, marshmallow root, milk thistle seed, NAC, and parsley leaf. As an integral part of the body's cleaning and filtering system, promoting kidney and liver function is essential for healthy drainage and detoxification during the protocol.

# Add-On Products

## Bowel Mover

Bowel Mover is a natural digestive aid that gently promotes bowel movements, supports intestinal health, peristalsis, and proper digestive function.

## GCO

GCO is formulated with nutrients and herbs — including astaxanthin, berberine HCL, cassia bark, and Masson pine bark — to support already existing healthy blood sugar levels, cardiovascular health, digestive function, and metabolism.
