# ABOUT CELLCORE

# From Pain to Purpose: Meet CellCore Founders Dr. Todd Watts and Dr. Jay Davidson

In 2017, two doctors sitting at a dinner table decided to go all-in on starting a supplement company. Not just any supplement company, but one that could provide truly effective, lasting solutions to support the body at the root level – as it naturally heals from common health imbalances.

When Dr. Todd Watts and Dr. Jay Davidson met, they'd both had experiences with chronic illness. For Dr. Davidson, it was his wife who nearly lost her life to Lyme disease. For Dr. Watts, it was his 10+ year struggle with the Epstein-Barr virus, Lyme disease, allergies, arthritis, chronic fatigue, memory loss, and more. All of these symptoms surfaced before he turned 40.

Even with temporary relief, there were cyclical patterns that came with trying to heal: Feeling good for a short period of time, then crashing a few days or weeks later. It seemed impossible to get well and stay well. A stronger foundation was needed to support the body, as it innately

knows how and is always trying to heal.

After years of trial and error Dr. Watts discovered the underlying root of his symptoms and made a full recovery. Dr. Davidson's wife also finally regained her health. They knew there were so many others they could help who were also seeking answers to similar struggles. In June 2017, Dr. Todd Watts and Dr. Jay Davidson partnered and founded CellCore Biosciences.

Today, our focus remains the same: to provide supplements that support the body at the root level, with ingredients that allow the body to do what it's designed to: **Heal.**

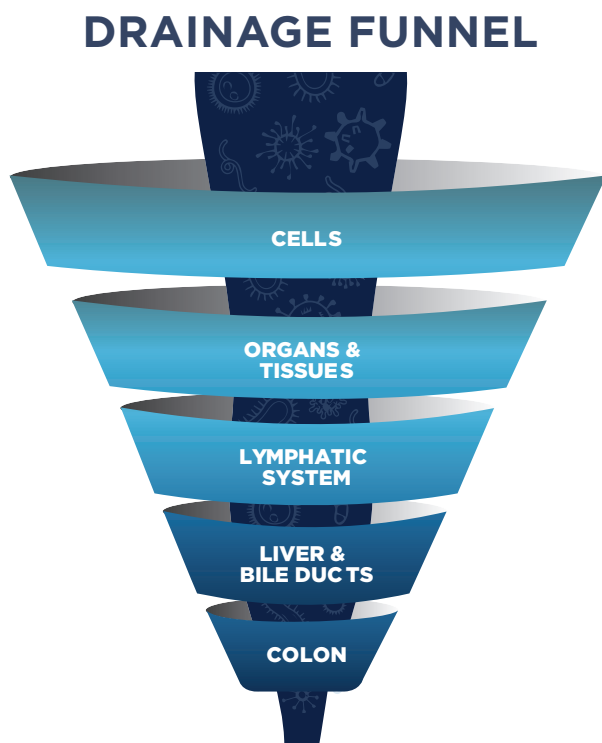

# FOUNDATIONAL MEDICINE AND THE ROADMAP TO HEALTH:

## Why Our Supplements are Designed to be Taken in a Specific Order

Foundational medicine is the missing piece in many integrative practices. The heart of Western medicine is to treat symptoms with pharmaceuticals. The heart of Functional medicine is to address vitamin and mineral deficiencies, nutrition, emotional health, and exercise. However, **Foundational medicine** comes before everything, because it addresses three key areas - in a specific order - that lay the foundation for the body to naturally heal, detoxify, and promote optimal wellness:

1

Supporting Mitochondrial function

2

Supporting the proper functioning of the body's drainage pathways, or what we refer to as the drainage funnel:

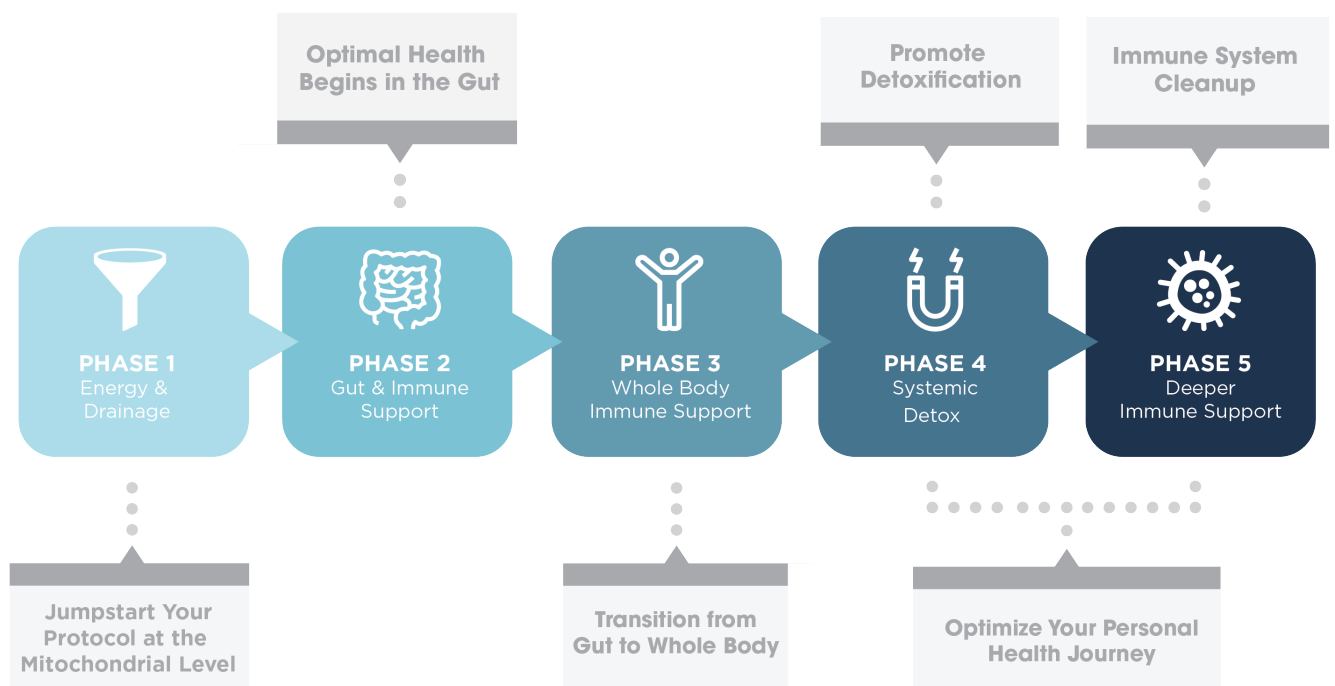

3

Supporting the body's natural ability to detoxify

We call this specific sequence the Roadmap to Health. All of our products and customizable protocols follow this order.

# Roadmap to Health

*This content is provided for informational and educational purposes only, and is not intended as, and should not be construed to be, medical or consulting advice. Physicians and other qualified health care practitioners should exercise their professional judgment in connection with the provision of services. Patients should consult their individual health care provider for specific treatment advice.*

Foundational medicine focuses on upregulating the mitochondrial function necessary for every cell, organ, and tissue in the body. This is what lays the groundwork for optimal health and allows the body to do what it was designed to do: **Heal.**

Our primary focus of addressing the underlying root cause of health issues avoids the common trap of *this symptom = this supplement or this lab marker = this supplement*. Instead, we support the underlying mitochondrial dysfunction that's at the root of many common health complaints today.

Mitochondria “turn on” and signal for every organ to work and function. They play a massive role not just in your energy levels, but your ability to detoxify, digest food, eliminate, support immunity, heal and repair, remember information, and so much more. If mitochondria are damaged, the entire body is impacted.

That is why our approach at CellCore Biosciences is built on this premise: First support the mitochondria, then promote the body's natural detoxification processes and the removal of stressors.

# BIOACTIVE CARBON™:

## THE DRIVING “FORCE” BEHIND PATIENT RESULTS

An effective binder is the missing link in any health protocol and routine. We’re dedicated to making products that support long-term health – and our proprietary ingredient, BioActive Carbon, plays a central role in that mission.

Many supplements never work as intended because they cannot navigate the body’s internal environment. BioActive Carbon is in the vast majority of CellCore products to help overcome this obstacle.

### What is BioActive Carbon?

BioActive Carbon is a proprietary blend of soil-derived fulvic acids that’s added to our supplements. This blend of fulvic acids acts as a binder, driver, and protector that supports the body at the cellular level.

# INDIVIDUAL SUPPLEMENTS

## Formulated with BioActive Carbon

BioActive Carbon is our proprietary blend of fulvic acids that support cellular repair and the body's natural ability to detoxify.\*

All of our supplements are formulated with BioActive Carbon with the exception of Para 1, IS-BAB, IS-BART, IS-BOOST, and IS-BORR.

# THE SCIENCE BEHIND THE BINDERS

- Amphoteric (gives or receives an electron/proton)
- Available energy for chemical reactions
- Aids in the balancing of minerals (including copper, iron, etc.)
- Contains polyelectrolytes and polyanions
- Supports the digestive tract
- Travels systemically through the body
- Supports cellular energy
- Aids nutrient/vitamin retention, absorption, and utilization
- Provides C, H, and O (building blocks to the body)
- Assists with tissue repair and cellular processes
- Selective binder
- Transmutates elements
- True chelator
- Aids upregulation of cellular respiration

## Advanced TUDCA

Supporting bile production is essential when it comes to promoting the body's natural ability to detoxify.\*

TUDCA (Tauroursodeoxycholic acid) is a water-soluble bile acid that's naturally produced by the body and found in liver bile. When taken as a supplement, it helps stimulate the release of bile into the digestive tract. This supports healthy digestion and drainage, the body's natural detoxification processes, and the health of the liver bile duct system.\*

**Note:** Many TUDCA supplements are sourced from animal bile. For purity and ethical reasons, Advanced TUDCA is synthetic.

## BC-ATP

BC-ATP is our most powerful supplement for supporting mitochondrial function.\*

When the body has the nutrients it needs to support mitochondria and ATP output, patients can experience improved cognitive function, mental clarity and focus, and sustained physical energy.\*

The highly charged organic acids support metabolism and the ATP cycle in being at peak efficiency.\* These carbons also assist in the body's natural detoxification processes, contribute to a balanced gut microbiome, aid cellular renewal, and support immune health.\*

## BioToxin Binder

BioToxin Binder aids the body’s natural ability to detoxify.\* It lends increased support to the gut microbiome, which optimizes immunity and digestive function.\* The addition of Carbon Technology also supports cellular repair and increased energy production.\*

BioToxin Binder is an ideal first-step detoxification support supplement. We recommend taking it prior to Carboxy, HM-ET Binder, or ViRadChem Binder.

## Bowel Mover

Bowel Mover is a natural digestive aid that gently assists bowel movements, supports intestinal health, peristalsis, and proper digestive function.\*

Twelve herbs and botanicals in this proprietary blend — including clove bud, fennel seed, garlic bulb, senna leaf, and wormwood — are formulated in specific ratios for maximum efficacy. They work together to increase water absorption in the stool and support normal digestive, intestinal, and stomach function.\*

PK0199-V03

## Carboxy

Carboxy is a binder that aids the body's natural detoxification processes and supports a balanced gut microbiome.\* It contains short- and long-chain carbons, which can travel to different parts of the body, beyond the gut. This makes Carboxy an ideal detox support supplement for whole body wellness.\* The addition of Carbon Technology helps increased cellular energy production and repair.\*

Carboxy is our most potent binder. It's primarily designed for clients who are in the intermediate stages of promoting detoxification.\* Because of this, Carboxy is typically recommended after a client has already introduced BioToxin Binder, ViRadChem Binder, or HM-ET Binder to their routine.

## CT-Biotic

CT-Biotic is a blend of spore-forming and non-spore-forming bacteria combined with Carbon Technology. It provides 11 bacterial strains that are essential for supporting detoxification, digestive function, and immunity.\*

The addition of Carbon Technology sets CT-Biotic apart from other probiotic supplements.

As a blend of fulvic and humic acids, Carbon Technology helps protect all bacterial strains from being destroyed or damaged by stomach acid, so that cultures are still intact by the time they reach the lower GI tract.

## CT-Minerals

CT-Minerals are a convenient way to help support your body’s daily micronutrient needs for optimal cognitive function, energy production, immune function, mental clarity, nervous system support – and to enhance your overall feeling of well-being.\*

Each capsule provides minerals derived from fulvic acid, which is sourced from the soil and decomposed plant life. Fulvic acids naturally contain trace minerals and are typically easier for the body to digest, absorb, and utilize.\*

In addition to their trace mineral content, fulvic acids help nourish the gut microbiome, support gut function, and may help assist nutrient absorption from other foods and supplements.\*

Other ingredients: Vegetable Capsule (Hydroxypropyl Methylcellulose), Polysaccharides, Rice Dextrin.

## Metabolic Activator

This one-of-a-kind liquid formula supports hormonal function, including sex hormones, glucose metabolism and the conversion of thyroid hormones (T4 to T3).\* Metabolic Activator can assist in upregulating production of cyclic AMP (cAMP), aid healthy antioxidant balance, and support healthy weight management.\*

Metabolic Activator combines iodine with Coleus forskohlii extract, selenium, potassium iodide, riboflavin, and molybdenum, which work synergistically to support thyroid and metabolic activity.\*

### Supplement Facts

Servings: 240  
**Serv. size:** 5 Drops (0.25mL), Amount per serving: Riboflavin (Vitamin B2) 0.15 mg (12% DV), Iodine (as Potassium Iodide, Elemental Crystal Iodine) 250 mcg (167% DV), Molybdenum (as Molybdenum Chelate) 5 mcg (11% DV), Selenium (as L-Selenomethionine) 6.25 mcg (11% DV), **Metabolic Activator Blend** (Coleus Forskohlii Extract [10% Standardization of Forskolin], BioActive Carbon® Technology BC1 [Humic Shale (containing Fulvic Acid)]) 5 mg

Other Ingredients: Vegetable Glycerin, Distilled Water.

## Para 1

Para 1 is our flagship immune and digestive support supplement, made from 100% pure Mimosa pudica seed.\* Naturally gelatinous, Para 1 becomes jelly-like and sticky as it makes its way through the GI tract. This encourages the removal of occasional intestinal buildup, supports the gut microbiome, and promotes the body's natural ability to detoxify.\*

### Supplement Facts

Serving Size 2 Capsules  
Servings Per Container 60
